

Electric heating mat - Girafus V-15 heating carpet

1. Function and features:

- A. Electric heating mat for indoor use only.
- B. The mat provides pleasant warmth to the feet, creating a sense of relaxation and well-being.
- C. Simply connect the heating mat to a normal 220-240 Volt power socket.
- D. Specially designed for use at home (for you, as a hobby or recreation activity) or at the workplace.
- E. Low current consumption, integrated thermostat, overheating protection function, waterproof interior heating wire padding and washable surface mat.
- F. Warm-up time of approximately 15 minutes.
- G. The heating mat complies with the CE and ROHS standard.

2. Technical parameters

| Model | Material | Size | Weight | Voltage | Power output |
|-------|-----------|----------|---------|-------------|--------------|
| V-15 | Polyester | 60*40 cm | 0.85 kg | 220 V-240 V | 85 W |

3. User instructions

- A. Carefully read these user instructions before using the heating mat.
- B. Place the heating mat on a dry and even surface and make sure that the power cable does not become knotted.
- C. Before connecting the mat to the 220-240 V power socket, check that the mat lies flat on the floor and that neither the mat nor the power cable shows any signs of damage. Perform this check before every use. If you are in doubt as to whether the mat is safe to use, do not connect the mat to the power socket, and contact us.
- D. After the power-on, the heating mat will start to warm up and the operating temperature will be reached after 15 minutes. The temperature is then automatically set between 40 °C~55 °C.
- E. The device must ALWAYS be powered off after every use. This is not only for your own safety, but also extends the service life of the mat.
- F. The surface mat (without the heating mat!!!) is washable, but make sure it is completely dry before reusing it.

4. Maintenance and storage:

- a. Never cover the mat so as to prevent overheating! Do not twist! For indoor use only!
- b. The surface mat can be washed separately by hand or in the washing machine! Pull out the power cable during cleaning! Do not wash the interior heating wire mat!
- c. Do not use it if it is damp or wet.
- d. Do not staple or nail it to the floor!
- e. Do not place the mat in water or step onto the mat with wet feet!
- f. Do not allow pets to chew on the mat!
- g. After you use it, store the mat in a dry place at ambient temperature!

5. Cleaning instructions:

Only the surface mat is washable, make sure to take out the internal heating wire part before cleaning!

Stain removal

Use a sponge soaked in lukewarm water and a neutral wool detergent. Remove the excess water with hand towels.

HAND WASHING

Wash the surface mat (without the heating wire mat!) in lukewarm water with a neutral wool detergent.

MACHINE WASHING

1. Fold and soak the surface mat in a mild soap and lukewarm water solution for 15 minutes. Make sure that the water temperature is below 30 °C.
2. Wash the mat in the mild soap and lukewarm water solution, using the soft and gentle program, for 2 minutes.
3. Do not use any bleaching detergents.

6. Further safety instructions:

- a. The mat must never be covered in order to avoid heat accumulation! The mat must not be used in bathrooms, saunas and other damp areas! It must not be used outdoors.
- b. Do not use the device in areas with potentially explosive atmosphere due to gases, chemicals or vapors.
- c. You are not allowed to operate the device if the heating mat or the power cable is damaged.
- d. Keep sharp objects away from the device. Do not secure the device with nails or bolts.
- e. If a light fabric becomes visible under normal wear and tear conditions, the carpet surface is worn-out and it has reached its usage limit, therefore you must stop using the heating mat for your own safety.
- f. Do not carry the mat by the power cable.
- g. The device may only be operated under supervision. The use of time switches, WLAN power sockets, room temperature controllers or other remote or automatic switching mechanisms is not allowed for the heating carpet.

Attention! The delivered electronic devices must not be disposed of with domestic waste; please hand the device over to a public collection point or simply send it back to us.
